

KARTIK GIRI

Smart - Contract Developer | Security Researcher

I am a smart - contract developer and security researcher working on decentralized technologies. With expertise in building and securing smart contracts. I specialize in coding, testing, secure readable smart contracts and finding bugs in blockchain protocols.

ACCOMPLISHMENT

- Built exogenous over-collateralized stablecoin pegged to 1\$ USD.
- Have audited couple thousands of solidity lines of code.
- Found couple of highs and medium vulnerabilities in defi protocols.
- Have a solid foundation of different types of protocols like DEFI , NFTs gamefi and RWA.
